

MyShield

First to detect. First to act.

Your On-Site First Responder

The world's first integrated security smoke-generating solution for proactive intruder intervention. MyShield actively protects your home and business with a powerful combination of motion detection, video, voice, and smoke diffusion.

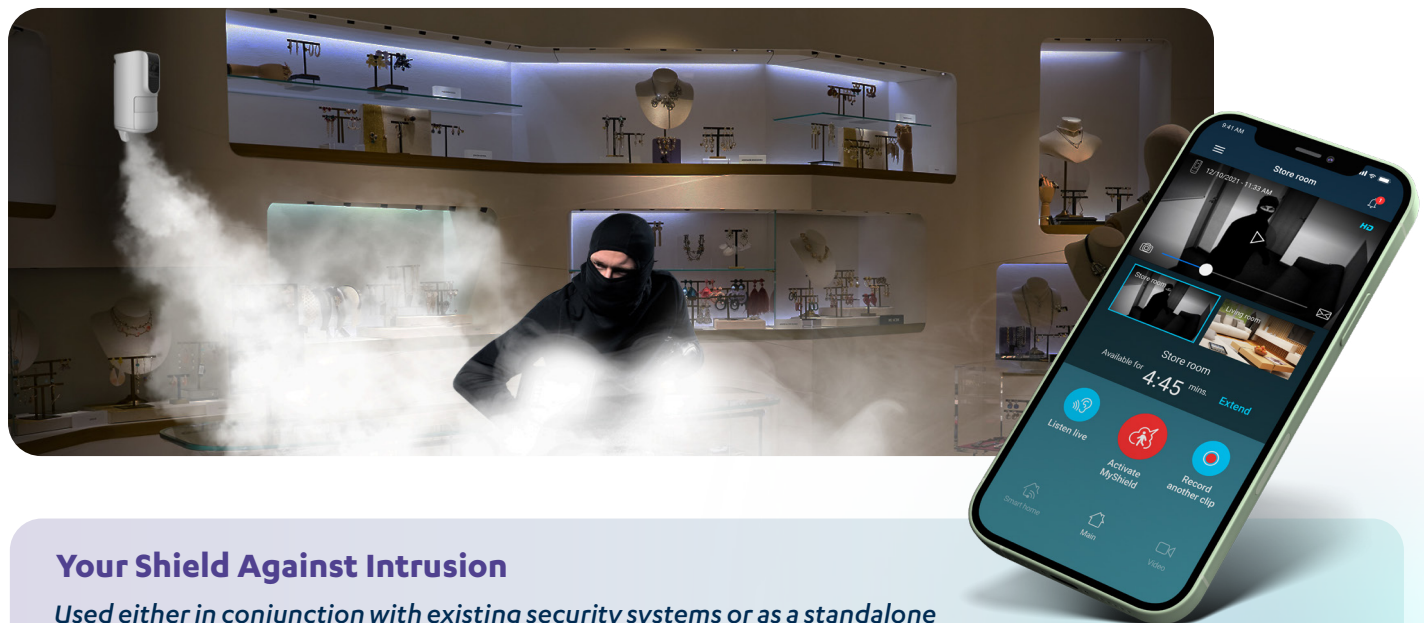

Remote Early Response

Existing home and small business security solutions detect intrusion immediately. Yet security first responders – who are critical to mitigating property loss or personal injury – can take time to arrive. Intruders know this and exploit the generous window of action it leaves them - leaving remote stakeholders powerless to intervene. Traditional passive intervention like sirens and strobes have been shown to offer only limited deterrence.

Remote Active Intervention

MyShield combines pet-immune motion detection, video verification, voice communication, and a proprietary smoke generator in a battery-powered EN Grade 2 Certified device with professional monitoring capabilities.

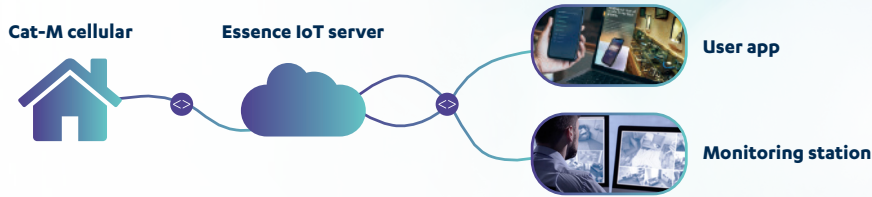

Your Shield Against Intrusion

Used either in conjunction with existing security systems or as a standalone solution, MyShield uses LTE CAT-M1 communication channels, and is not dependent on local communication infrastructure.

First to detect. First to act.

All-in-one integrated device

- ✔ Essence's proprietary smoke cannister
- ✔ Fills a room in under 30 seconds
- ✔ Non-toxic
- ✔ Non-stick
- ✔ Non-lingering

MyShield Advantages

- Standalone** – Standalone solution offers independent end-user monitoring
- All-in-one** – full security system in one device: HD camera, motion detector, voice capabilities, and security smoke generator
- Proactive** – End-user immediate response to threats, without the uncertainty of on-prem security response
- Low touch** - Simple installation, small form factor, battery-powered
- Flexible deployment** - Easy integration with existing security systems or fully-independent user-facing operation
- Scalability** - Multiple MyShield devices can be connected to manage larger spaces, multiple rooms, and multiple locations

Protecting people and property

MyShield for Businesses

For retail and other business locations, MyShield adds an all-in-one, low-touch layer of monitoring and active intruder protection. MyShield empowers business owners – enabling them to protect their assets both independently and alongside security providers.

MyShield for Homeowners

With MyShield, homeowners gain a direct channel of home defense against intruders. MyShield returns power to the homeowner's hands – enabling active real-time intervention independently or in conjunction with security professionals.
